DETAILED ACTION

Examiner acknowledges receipt of response to the election/restriction requirement and remarks filed 10/31/05. Claims 24-59 are pending.

Election/Restrictions

Applicants elected Group II and further elected growth factor as the biologically active agent, a biocompatible membrane in response to the election/restriction requirement. However, applicants elected Group 1 without indicating traverse or without traverse and thus it is assumed that the election of Group I is without traverse. Examiner also agrees with applicants that upon identification of allowable subject matter, the search will be extended to the non-elected species within the group. Examiner further acknowledges applicant's identification of claims 25-32, 34-43, 50-52, 55-57 and 59 as reading on the elected invention.

The search is however extended to DNA as the biological agent.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 25-59 are rejected under 35 U.S.C. 102(b) as being anticipated by Bielinska et al. ("Application of membrane-based dendrimer/DNA complexes for solid phase transfection in vitro and in vivo," in *Biomaterials*, 21 (2000), pages 877-887).

Art Unit: 1618

Bielinska discloses a composition that comprises a biocompatible membrane that is associated with dendrimer, that is desiccated and that is used to contact skin tissue (see pages 877-887).
